

cleanic[®] - Antimicrobial Fittings
New solutions for health and hygiene.

cleanic® - Antimicrobial Fittings

The new fittings are cast in special copper alloys and provide protection for your health. Global studies, tests and laboratory studies have confirmed the effectiveness of copper.

Copper is effective. Permanent. Antimicrobial. Protection for your health.

New solutions for health and hygiene

The cleanic® fittings are cast in special copper alloys and ensure a reduction of bacteria, viruses and germs up to 99,9% within a short time.

This effect was confirmed by the U.S. Environmental Protection Agency (EPA) and impressively tested in the Asklepios Clinics in Hamburg. The research was scientifically supported by the German Copper Institute DKI.

The antimicrobial effects retain for decades, even if they are treated with cleaning- and disinfection agents.

Available in two surface finishes

Application areas for the new antimicrobial fittings:

hospitals

surgeries

kindergartens

nursing homes

schools

airports
