Lever handles with function roses

- suitable for locks "ATELIER F/R"

Lever handles with function roses

lever handles - **basic function, satin stainless steel.**

The entrance can be operated from inside without locking oneself up.

mitred form	22.300.0000.426
crescent form	22.302.0000.426

Lever handles with function roses

lever handles - **switch keying, satin stainless steel.**

The entrance can be operated from outside through the key without being locked in.

mitred form	22.308.0000.426
crescent form	22.310.0000.426

Lever handles with function roses

lever handles - **basic function with indicator and emergency opening, satin stainless steel.**

The entrance can be operated from inside without locking oneself up. In case of an emergency the door can be opened from the outside.

mitred form	22.304.0000.426
crescent form	22.306.0000.426

The lever handles can be switched into free motion through these function roses. While the inside lever handle keeps its normal function, the outside lever handle has no function. Thereby nobody is locked in whilst admittance from outside is refused.

This function can only be used when the lock is not bolt (blocked).
