Door holder with Footlock

- applicable for medium door weight
- arresting on each opening angle
- all versions equipped with special hub spring for higher pressure of the kicking bolt
- special versions with floor bush for slippery floors and high wind force and therefore suitable for higher door weights (up to 100kg)
- various materials and surfaces

The special hub spring enables a very high pressure of the kicking bolt – suitable for high door weights.

More safety and comfort.

Door holders with footlock shall not be mounted on emergency exit, panic doors or smoke and fire proof doors.

Door holder with hook and endstop

- suitable for particularly weight doors
- spring-loaded end stops preserve the doors
- disabled hooks enable the use as end-stop on demand

The spring suspension of the end-stops protects the doors. That way damage to heavily frequented doors is prevented.

Longer life time of the door element.

Door holders with hook and endstop shall not be mounted on smoke and fire proof doors.

Magnetic door holder

- operation by pushing or pulling the door with minimum force
- minimal effort
- smooth height adjustment
- springy bearing of the magnets prevent door damages
- adhesive counter plates enable the suitability for glass doors

Magnetic door stay fasteners are suitable for use in barrier-free rooms. Also applicable for geriatric care houses, hospitals and residential homes.

Barrier-free security and comfort.

Door holders with magnet shall not be mounted on emergency exit, panic doors or smoke and fire proof doors.

Door and Gate stop for any door weight

- end stop damping
- maximum protection against damage due to damped bedstop
- efficient noise protection – particular for non residential applications
- various surfaces and designs
- protection of the hinger

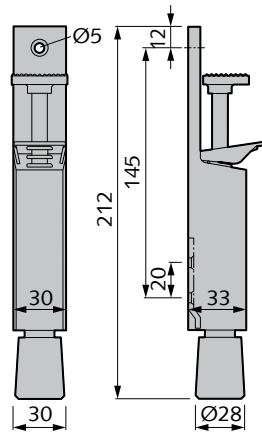

For best results please install buffer with as clearance possible between buffer and door hinge side. Floor or wall installation possible.

Longer life time of the door element.

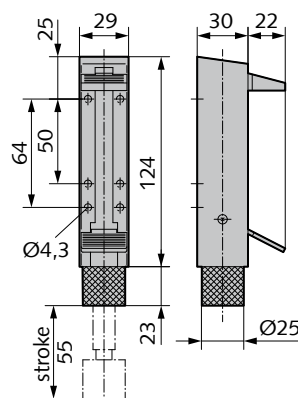

Door and Gate stops for any door weight shall not be mounted on smoke and fire proof doors.

Door holder

- up to 40 kg door weight
- aluminium case
- with zinc plated steel kick-bolt
- with extended screwing plate as kicking protection

06.300.0000.010	200	St bright zinc plated
06.300.0000.405	200	304 mill finish

Function:

The door can be opened up to 125° and can be held in any position. The braking power can be adjusted by turning or the knurled screw (3).

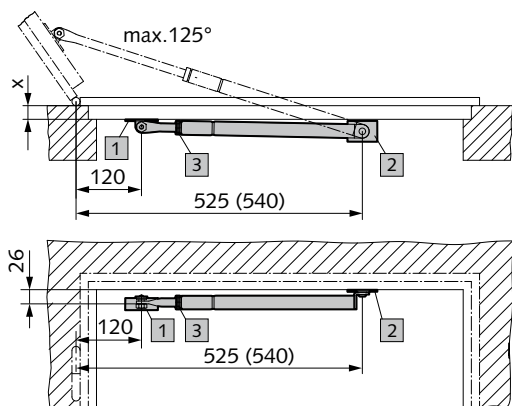

Installation:

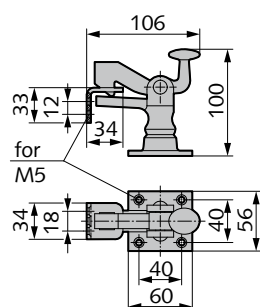

Screw-on the bedstop angle (1) with the distance of 120 mm, measured from the center of the door-hinge to the center of the hexagonal-screw to the door leaf. The distance from the lower edge of the door frame to the center of the screwing-holes must be 26 mm. Screw the screwing-plate (2) with a distance of 525 mm from the center of the door-hinge to the center of the angle of rotation under the door frame. When the door is closed, the distance between the door leaf and the screwingplate (2) should be 2-3 mm.

There's a screwing instruction included in every single-package.

Note:

The door brake must not be used as end-bedstop.

Art.-N°	L	Material/Surface
06.454.0060.113	60	Al E5/C-0 silver anod.
06.454.0060.426	60	304 matt brushed
06.454.0080.113	80	Al E5/C-0 silver anod.
06.454.0080.426	80	304 matt brushed
06.454.0100.113	100	Al E5/C-0 silver anod.
06.454.0100.426	100	304 matt brushed
06.454.0120.113	120	Al E5/C-0 silver anod.
06.454.0120.426	120	304 matt brushed

Note:

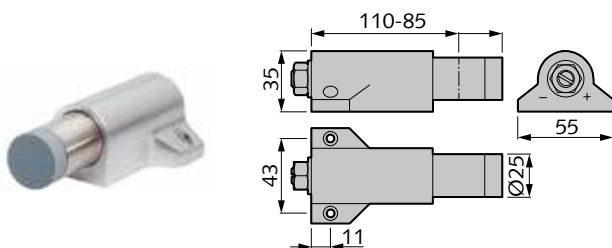

The rubber buffer is also available in white and in special length.

Rubber buffer

- suitable for 2 mm steel frame
- drilling-hole 6 mm diameter

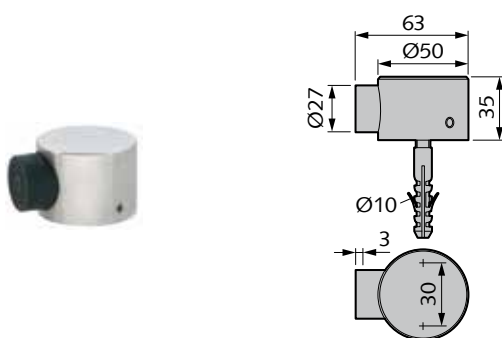

Art.-N°	Material/Surface
06.455.0000.565	Plastic black

Door buffer with adjustable spring-pressure

- up to 30 kg door weight
- with grey rubber puffer
- for frame-mounting

Art.-N°	Material/Surface
06.500.0000.113	Al E5/C-0 silver anod.

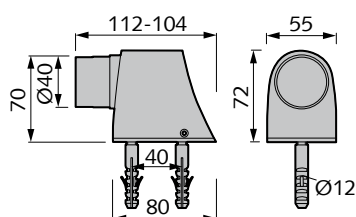

Door buffer for floor mounting, spring-loaded

- up to 75 kg door weight
- aluminium or stainless steel
- with black rubber puffer
- incl. fixing material

Art.-N°	Material/Surface
06.501.0000.113	Al E5/C-0 silver anod.
06.501.0000.426	304 matt brushed

Note:

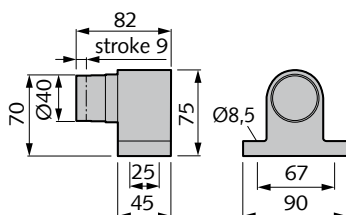

Shim for height adjustment, 10 mm high (Art.-N° 50013764).

Door buffer for floor mounting, spring-loaded

- up to 120kg door weight
- with black rubber puffer
- stainless steel buffer bolt (anodized version)
- incl. fixing material

Art.-N°	Material/Surface
06.502.0000.113	Al E5/C-0 silver anod.
06.502.0000.198	Al stainless steel finish
06.502.0000.235	Al silver lacquered

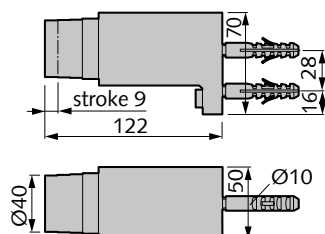

Door buffer for floor mounting, spring-loaded

- up to 100kg door weight
- aluminium or stainless steel
- with black rubber puffer
- stainless steel buffer bolt (anodized version)
- without stone thole pin

Art.-N°	Material/Surface
06.503.0000.113	Al E5/C-0 silver anod.
06.503.0000.220	Al black lacquered
06.503.0000.235	Al silver lacquered
06.503.0000.245	Al dark brown lacquered
06.503.0000.426	304 matt brushed

Note:

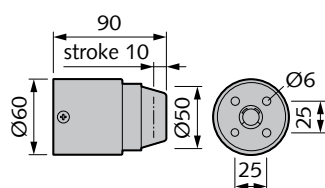

The right stone thole pin to walling Art.-N° 50003668.

Door buffer for floor mounting, spring-loaded

- up to 100kg door weight
- with black rubber puffer
- stainless steel buffer bolt (anodized version)
- incl. fixing material

Art.-N°	Material/Surface
06.505.0000.113	Al E5/C-0 silver anod.
06.505.0000.235	Al silver lacquered

Gate stop, spring loaded

- up to 200 kg gate weight
- steel or stainless steel
- for wall installation

Art.-N°

Material/Surface

06.550.0000.020

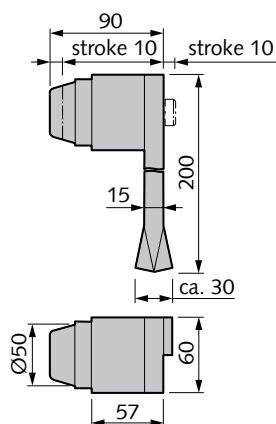

St black lacquered

06.550.0000.035

St silver lacquered

06.550.0000.426

304 matt brushed

Gate stop, spring loaded

- up to 200 kg gate weight
- for floor installation

Art.-N°

Material/Surface

06.551.0000.020

St black lacquered

06.551.0000.035

St silver lacquered

Note:

Mounting depth min. 100 mm
